Train Simulator

Release D

#### Minimum:

**OS:** Windows® Vista / 7 / 8

**Processor:** Processor: 2.8 GHz Core 2 Duo (3.2 GHz Core 2 Duo recommended), AMD Athlon MP (multi

English

Very nice to drive, can get it up to 55 easily with a long freight. Recommended.. Of all the steam engines, this remains one of my overall favourites, its not super fast by any standard but able to pull at a reasonable speed, huge trains of coal and goods and is very easy to learn its ways and means to make it go. It feels very at home in the Woodhead area, is great fun and at the new classic price, well worth a go.. Old model, so not much detail, but looks OK, and nice to drive; pulls a huge load and apart from the whistle, the sounds are pleasing - a hefty chuff and puff.. A lovely locomotive add-on for Train Simulator 2017. I wonder if the creators would be willing to do a new livery for the Robinson O4, as 13 of the ex-ROD WW1 locomotives came to Australia and worked on some of the New South Wales coal railways.. It may be strong yes, but strong enough to pull a 41 car train

---

including brakevan excluding tender up a 1:50/2% gradient.. This DLC is good. The sounds are amazing thanks to Steam Sounds Supreme and i found out there is a V2 in the pack hidden.. Great classic locomotive. It doesn't have cab light and advance functionality, but this locomotive is a great one for the Woodhead route and can also be used on the SDJR. Really fit nicely in and a powerful locomotive for its size.. Ordinary loco, nothing special. Not near as nice looking or fun to drive as a lot of other steam locos in the collection. Outdated model with little detail or features K4s, A4s, the Black 5s, all the JXs, Castles, FEF, Kings, GWRs, Panniers, etc., are all much better. I think the only reason I got this is that it's a dependency in a lot of workshop scenarios.. A really nice loco with an odd wheel configuration. The model is nice and runs well.
